LinkedIn: www.linkedin.com/in/sidhartha-manríquez-ba8673b1/

Business Intelligence and Advanced Analytics professional with experience transforming complex data into actionable insights, performance metrics, and strategic recommendations across travel, financial, and digital environments. Experienced in KPI development, exploratory and statistical analysis, customer and behavioral analytics, segmentation, and performance measurement. Combines strong business acumen with technical expertise in SQL, Python, Power BI, Databricks, AWS, and Machine Learning to build scalable analytics solutions and support data-driven decision-making.

EXPERIENCE

► Senior Data & Analytics

Monsprint

January 2025 - Present

Advanced Analytics and Data professional with experience driving data-informed business decisions through statistical modeling, Machine Learning, KPI development, and large-scale data analysis. Experienced in translating complex datasets into actionable insights, identifying business drivers and leading indicators, and building scalable analytics solutions using Python, Databricks, and AWS. Strong background in cross-functional collaboration, analytical strategy, and delivering measurable business impact across travel, financial, and digital environments.

- **Advanced Analytics & Business Insights.**

Led data analysis and statistical modeling initiatives to identify business drivers, define key metrics, and translate complex datasets into actionable insights for strategic decision-making.

► BI Data Engineer

Nike

February 2023 – September 2024

Led Business Intelligence and Advanced Analytics initiatives to transform complex datasets into actionable insights, performance indicators, and strategic recommendations. Conducted advanced exploratory data analysis (EDA) on large datasets to identify behavioral patterns, trends, anomalies, correlations, and key drivers of business outcomes.

Developed scalable analytical datasets, dashboards, and automated data pipelines using SQL, Python, Power BI, Databricks, and AWS, enabling reliable and reproducible reporting and analytics.

- **Scalable Analytics & Data Platforms.**

Led the development of scalable data and analytics pipelines across AWS and Databricks, enabling reliable, automated, and reproducible insights for cross-functional business teams.

► BI Advanced Analytics

Expedia

November 2021 – February 2023

Performed exploratory data analysis (EDA), including distribution analysis, correlation analysis, trend analysis, and time-series analysis, to generate actionable insights for business performance. Defined, calculated, and monitored key performance indicators (KPIs), including visits, bounce rate, time on page, and other digital engagement metrics. Developed analytical datasets and scalable data pipelines using Databricks and AWS, supporting reliable and reproducible analytics across multiple business domains.

- ***Travel & Marketplace Analytics***

Led the development of scalable data and analytics pipelines across AWS and Databricks, enabling reliable, automated, and reproducible insights for cross-functional business teams.

► BI Analytics

Unilever

November 2020 – October 2021

Strong business acumen with experience leading Business Intelligence and Analytics initiatives, translating business needs into actionable insights, performance metrics, and strategic recommendations. Designed KPI frameworks and executive Power BI dashboards to monitor business performance, identify trends and key drivers, and enable data-driven decision-making. Combined business expertise with SQL, Python, Databricks, AWS, and Machine Learning to deliver scalable and high-impact analytics solutions.

- ***Performance management & decision-making***

- Monitor business performance, identifying trends and supporting regional management in data-driven decision-making. Develop and maintained KPI frameworks and interactive Power BI dashboards to monitor business performance identify trends and support data-driven decision-making.

► BI Data Analyst

Banamex

August 2015 – February 2019

Worked as a BI Data Analyst, leveraging SQL extensively to extract, transform, validate, and analyze data to address business requirements and support data-driven decision-making. Conducted exploratory data analysis (EDA) and statistical analysis to identify actionable patterns, anomalies, trends, and business insights. Developed and maintained analytical reports and performance metrics, translating complex data into clear information for business and cross-functional teams.

- ***KPI's & Insights generation***

Change management and data delivery processes using Jira, confluence and github ensuring traceability, consistency, and effective communication across analytics initiatives.

EDUCATION

► Technological University of Mexico

Master's in Predictive Analytics and Business Intelligence
2025 – 2026

► Technological University of Mexico

Computer Systems Engineering
2012 – 2016

► Technological University of Mexico

Master's in finance
1998 – 1999

► Technological University of Mexico

Bachelor's degree in Business Administration
1994 – 1997
