CORE EXPERTISE

Data & Analytics

- ▶ *Advanced Analytics*
- ▶ *Predictive Analytics*
- ▶ *Business Intelligence*
- ▶ *Segmentation*
- ▶ *Data & Analytics Strategy*
- ▶ *Exploratory Data Analysis*
- ▶ *Statistical Analysis*
- ▶ *KPI & Performance*
- ▶ *Predictive Modeling*
- ▶ *Customer Behavioral*
- ▶ *Time-Series Analysis*

AI / Machine Learning.

- ▶ *Machine Learning*
- ▶ *Statistical Modeling*
- ▶ *Predictive Modeling*
- ▶ *Predictive Modeling*
- ▶ *Pattern & Anomaly Detection*
- ▶ *Data-driven Decision Making*

Data & Technology

- ▶ *SQL*
- ▶ *Python*
- ▶ *Power BI*
- ▶ *Data Transformation*
- ▶ *Databricks*
- ▶ *AWS*
- ▶ *Spark*
- ▶ *Data Pipelines*

EXPERIENCE

► Senior Data & Analytics

Monsprint

January 2025 – January 2026

Advanced Analytics and **Data** professional focused on transforming complex datasets into actionable insights, analytical models, performance indicators, and strategic recommendations.

- Led **Advanced Analytics** and **Business Intelligence** initiatives to identify business drivers, patterns, trends, anomalies, correlations, and performance indicators.
- Conducted exploratory and statistical data analysis on large datasets to identify behavioral patterns and drivers of business outcomes.
- Developed analytical datasets and scalable data pipelines using **SQL**, **Python**, **Power BI**, **Databricks**, and **AWS**.
- Applied analytical and statistical techniques to transform complex datasets into actionable business insights.
- Developed scalable analytics solutions supporting reliable, automated, and reproducible analysis for cross-functional business teams.
- Collaborated with business stakeholders to translate analytical findings into performance insights and strategic recommendations.

► BI Data Engineer

Nike

February 2023 – September 2024

Business Intelligence and **Advanced Analytics** initiatives focused on transforming complex datasets into actionable insights and strategic recommendations.

- Conducted **Exploratory Data Analysis (EDA)** to identify behavioral patterns, trends, anomalies, correlations, and key business drivers.
- Developed analytical datasets and scalable data pipelines using **SQL**, **Python**, **Power BI**, **Databricks**, and **AWS**.
- Built automated and reproducible data processes supporting analytics, reporting, and cross-functional decision-making.
- Translated complex analytical outputs into business performance indicators and actionable insights.
- Supported the development of scalable data and analytics platforms across **AWS** and **Databricks**.

► BI Advanced Analytics

Expedia

November 2021 – February 2023

Performed Exploratory Data Analysis (EDA) including distribution, correlation, trend, and time-series analysis.

- Generated actionable insights to support business performance and decision-making.
- Defined, calculated, and monitored **Key Performance Indicators (KPIs)**.
- Developed analytical datasets and scalable data pipelines using **Databricks** and **AWS**.
- Supported reliable and reproducible analytics across multiple business domains.
- Applied data analysis to identify behavioral and performance patterns

► BI Analytics

Unilever

November 2020 – October 2021

- Led Business Intelligence and Analytics initiatives translating business requirements into actionable insights and performance indicators.
- Designed KPI frameworks and executive Power BI dashboards for business performance monitoring.
- Identified trends, business drivers, and performance patterns to support data-driven decision-making.
- Combined business expertise with SQL, Python, Databricks, AWS, and Machine Learning to deliver scalable analytics solutions.
- Supported regional management through performance analytics and data-driven decision-making.

► BI Data Analyst

Banamex

August 2015 – February 2019

- Leveraged SQL to extract, transform, validate, and analyze data according to business requirements.
- Conducted exploratory and statistical analysis to identify patterns, anomalies, trends, and business insights.
- Developed analytical reports and performance metrics supporting business and cross-functional teams.
- Translated complex data into actionable business information and decision-support insights.
- Developed and maintained KPI frameworks and analytical reporting processes.
- Supported data delivery and change-management processes using Jira, Confluence, and GitHub

EDUCATION

► Master's in Predictive Analytics and Business Intelligence

Technological University of Mexico 2025 – 2026

► Computer Systems Engineering

Technological University of Mexico 2012 – 2016

► Master's in finance

Technological University of Mexico 1998 – 1999

► Bachelor's degree in Business Administration

Technological University of Mexico 1994 – 1997
